

Teaching Notes for *An Exploration of Case Management Courses in University Curricula*

Developed by Elizabeth McElhinny, MSW candidate
University of North Carolina, Chapel Hill
School of Social Work

Slide 1

This lecture reviews a study conducted on the use of case management courses in university curricula. It demonstrates the need for courses as well as explores what is currently being offered across the country.

Slide 2

Discussion Question:

Before reviewing slide ask: How would you define case management?

Slide 3

Discussion Question:

How is case management used today?

Slide 4

Discussion Question:

What experiences have you had with case management?

Slide 5 and 6

Discussion Question:

Evaluate the rationale and selection process for this study. What advantages can you see to the way the study was designed? What disadvantages can you see as to how the study was designed?

Slide 7

Discussion Question:

Evaluate the data collection process.

Slide 9 and 10

Spend time looking at this graph and use it with the Results found in Slide 10.

Slide 11 and 12

Spend time looking at this graph and use it with the Results found in Slide 10.

Slide 13

Discussion Question:

What problems do you anticipate with the differing definitions of case management?

Slide 14 and 15

Spend time looking at this graph and use it with the Results found in Slide 15.

Slide 16

Group Activity

Divide the class into groups of 4-5 students. Have the students design a future study as indicated on Slide 16 (or come up with a new future study). What would be the rationale for the study? What would they need to operationally define? Who would they study? Where would they get their information and collect their data? How long would they anticipate the study taking?

Have the groups share their ideas with the class.
