

Unveiling the Mask: Cognitive Processing Therapy

Program Description

This informative and interactive workshop will provide participants with the necessary interventions to promote healing for adults experiencing the effects of traumatic life events and related conditions. Recognized as a best practice model for the treatment of PTSD, Cognitive Processing Therapy (CPT) has proven to be effective in such issues as trauma, depression, and related conditions. Through case examples, participants will increase their awareness of the effects of trauma on adults and learn interventions to promoting healing.

Learning Objectives:

Upon completion of this workshop, participants should be able to:

1. Outline the effects of trauma on adults.
2. List trauma-related symptoms.
3. Describe interventions to promote healing.

Target Audience

This workshop will benefit mental health practitioners, educators, human service professionals, community advocates, and individuals interested in this topic.
